

ECOFLOOR Thermostat Wi-Fi

Programmable via the thermostat or APP from the Apple store or Android Playstore

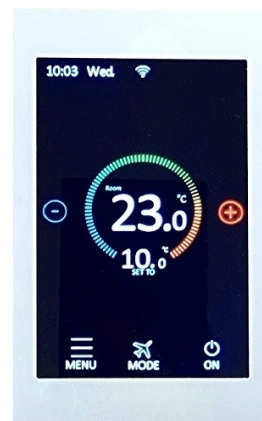

Supplied with a floor sensor. It is fully configurable via the easy to use menu-based interface as either, floor sensing, room sensing or room sensing with a floor limit.

The thermostat has a separate output for controlling heated towel rails. The thermostat may be mounted vertically or horizontally in a standard NZ flush-box.

Product Codes

White: 08-SK99W+

Black: 08-SK99B+

Benefits:

Large easy-read screen.

Permanent program retention during power loss

Adaptive logic

Simple to use menu.

Calibratable sensor.

1 piece fit to NZ flush box

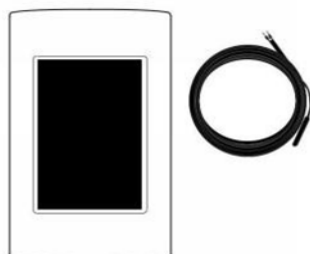

Approvals:

Type

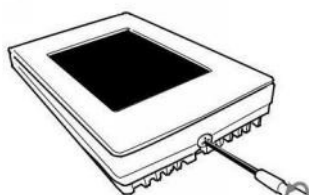

Value

Operation voltage	230VAC
Maximum resistive load	16A
NTC Sensor	10kOhms @ 20 degrees C
Sensor calibratable, room, floor.	Yes
Sensor length	2.5M
Temperature range	+5 to +60 degrees C
IP rating	IP20
Bezel size	80mm X 120mm
Screen size	55mm X 82.5mm

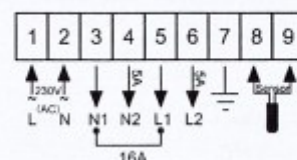

Thermostat package includes

- Thermostat
- Sensor cable

Remove the screw in the base of the thermostat and separate the display from the base

Wiring Diagram:

Connect the floor sensor, power leads and load leads.
Mount base into NZ flush box and refit display.
