

Ecofloor Under Tile Heating Cable

Data Sheet.

Ecofloor under-tile heating cable kits are the ideal **loose cable** solution for undertile heating in bathrooms, ensuites, kitchens, laundries or anywhere that you want warm tiles beneath your feet.

The **Ecofloor** cable kit is supplied with a 10 year manufacturers warranty applies from the date of installation.

As a slim-line cable of approximately 2.5mm in diameter, there is no concern about the tiles being raised and because they have just the one cold-tail, installation is simple. For areas larger than 15 SQM, elements may be parallel wired.

The **Ecofloor** undertile heating kits include

- > **Ecofloor** single ended twin conductor element
- > fixing tape.
- > spacing guide.
- > 1.5M of 10mm diameter flexible sensor conduit for the floor sensor.
- > Installation test certificate and 10 year warranty.
- > The carton in which the element is supplied has a punch-out aperture so that the cable can spool out from the end of box for simple and tangle free installation.

Part Number	Length (M)	Wattage (W)	Resistance (Ω)	Minimum Area	Maximum Area
02-120225	16.8	225	235.11	1 SQM	1.6 SQM
